[Redacted] Training
Facility Requirement

1. As requested and based on a short visit to the site on 18 September 1967, a preliminary estimate has been made. It is estimated that approximately \$10,000 will be required to provide the necessary air conditioning, heating, electrical (interior), vault door, and fire detection system. The estimated sum of \$10,000 does not include partitioning, acoustical work, interior painting, security protection or alarm, and electrical service to the building which would be accomplished by the power company at no cost to the owner.

2. The Realtor has informed this office that the owner will be responsible for the following items:

- a. The existing heating system.
- b. Water supply and sewage system.
- c. Exterior painting and repairs.

3. For a complete and more accurate estimate, a study by our staff would be required upon receiving your complete requirements such as floor layout (including new partitions), electrical outlets, security protection, etc.
